Subject: Microsoft Settlement

I don't believe that the settlement is fair. We have lost many great companies because of the predatory nature of Microsoft. I have been forced to buy their operating systems with new pcs, even though I don't use their operating systems, I use linux.

I am currently in the process of signing up for the class action suit in Minnesota.

Please do not let them get off of the line this easily. We cannot bring our lost companies back, but we CAN do something about the companies that are left.

Also, in my opinion, their sales will not affect our economy as much as the lost companies would have. They are being boycotted in many countries because of their practices. We are losing our market share in these remote locations because of them.

Thanks,

Steve Russo
